

BMA MENA is expanding its activities

*Experts of BMA MENA
during a meeting at the
BMA office in Cairo*

BMA MENA provides local supplies, procurement and engineering services to complete BMA's range of services so that customers receive comprehensive and complete solutions for their needs. From initial studies to post-commissioning training, BMA has the ability and skills to successfully complete large projects within the contract's budget and time schedule.

BMA MENA experts are present throughout the whole MENA Region and provide customers in the food industry, especially in the field of sugar and potato applications, with valuable consulting services, engineering services, project management, local manufacturing and after sales services.

With its highly committed team of experienced engineers from Tunisia, Algeria, Morocco and Egypt, and with the support of experts in Germany, BMA MENA has been able to successfully complete various projects.

Rehabilitation of two sugar refineries in Algeria

BMA MENA has concluded a consulting contract with the Algerian investor Ouest Import for the rehabilitation of the Khemis Meliana sugar refinery. The scope of services includes the inspection and assessment of the existing equipment. This job was completed in a very short time, between Christmas and the end of 2008. As part of a privatisation programme Ouest Import has taken over two sugar refineries, which needed to be renovated and rehabilitated. As a result of the assessment phase an action plan has been prepared and implemented during a scheduled stop of the refinery. During this assessment period several interventions have been made to define the actual shape of the equipment and to prepare a maintenance and renovation plan.

When the first action plan has been implemented and the refinery recommissioned, the first items of equipment will be replaced. With the new equipment, the emphasis will above all be on a higher capacity. In this connection, the outdated centrifugals in the factories Khemis Meliana and Mostaganem will be replaced with modern BMA centrifugals. The contract for these machines was signed at the end of 2009.

Detailed engineering for Dakahlia Belkas II, Egypt

BMA MENA received the order from Dakahlia Sugar Company for the elaboration of the piping engineering for the process building of the new Belkas II sugar factory. BMA MENA established a team in Cairo to provide such detailed engineering, with local experts supervised by specialists from Germany. The PID and know-how were provided by BMA Germany, who also supplied the key equipment and the process engineering for the new project in coordination with ESIIIC.

Dr Mohsen Makina

Benefits

- Complete customised solutions
- Short response times and comprehensive customer service
- Local service with German quality
