

For optimum discharge.

G19 U DISCHARGER UPGRADE KIT

Discharger and discharge valve actuator for the G series.

High availability for centrifugals. Discharger upgrade.

The G19 discharger for G-series batch centrifugals from BMA is a completely new development. Compared to its predecessor, the guiding system is even more stable and less prone to contamination. Other new features are the air cylinder-based hood actuator and the G19's accurate centring device.

Benefits

- Closed lubrication system
- No contamination of sugar with lubricants
- Meets maximum hygiene standards
- Optimised centring device for hood actuator
- Prevents caking
- Little wear
- Minimal maintenance

The upgrade kit comprises

- Discharger with plough
- Hood actuator with actuating cylinders, actuator guide ring and track rollers
- Updated centring device
- Guards for discharger, hood actuator and centring device

Installation is supervised by a centrifugal specialist from BMA.
