

Switching to turbo mode.

TURBO3 UPGRADE KIT

Product distributor for K2300 continuous centrifugals.

More power. Excellent technological results.

Developed by BMA, the Turbo3 product distributor for K3300 centrifugals has proved successful in operation time and again. Its excellent technological results are particularly impressive. The crystal suspension is heated as it passes through the product distributor, lowering its viscosity and considerably improving separation. Additional features are its co-rotating steam hood and simple assembly.

Following the success of the Turbo3 with the K3300, BMA now also offers it as an upgrade kit for its K2300 series.

Benefits

- Throughput increased by up to 15 %
- Low maintenance
- Improved sugar quality
- Reduced wash water
- Reduced sugar losses
- Easy to replace
- High operational reliability
- Quick return on investment

The upgrade kit comprises

- Turbo3 product distributor made from 1.4571 steel
- Steam nozzle assembly made from 1.4571 steel
